

QUICK REFERENCE TABLE LETTUCE

Variety	Type	Maturity* (days from transplant)	Season	Head size*	Colour*	Butt core*	Head solidity*	Bolting reaction*	Market segment	Comment
Taina	Crisp head	60 - 65	Warm season	Medium-large	Medium dark green	Medium	Very good	Slow	Fresh, punnetting & home garden	Excellent results are consistently achieved in sub-tropical regions
Elisa	Butter head	65 - 75	All year	Medium-large	Medium to dark green	Medium	Medium to good	Slow	Novelty, pillow pack & home garden	Widely adapted, except in extreme heat or cold conditions
Veneza Roxa	Red leaf lettuce	70	Mainly cool season	Medium-large	Deep red to green at base of leaf	Small medium	Fair	Very slow	Novelty, pillow pack & home garden	Seldom suffer from Tip burn under conditions normally conducive to the disorder, very slow to bolt
Vera	Green leaf lettuce	60 - 65	All year	Medium-large	Medium green	Medium	Poor to fair	Slow	Hydroponics, novelty & home garden	Early maturing, widely adapted, except in extreme heat or cold conditions

* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer.

FB.R. WARNING: VARIETY PROTECTED UNDER **PLANT BREEDERS RIGHTS**. UNAUTHORIZED MULTIPLICATION AND/OR MARKETING OF SEED PROHIBITED.

Disease reaction key:

IR: Intermediate resistance **HR:** High resistance

Abbreviation	Common disease name	Pathogen name
Ecl	Powdery mildew	<i>Erysiphe cichoracearum</i> f. sp. <i>lactucea</i>

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).

Experimental: This variety does not appear on the current South African Variety list, but has been submitted for registration.

Recent version: Kindly contact Sakata or Area Representative for the most recent version of this Technical Bulletin.
